PROFESSIONAL SUMMARY

Results-driven Data Scientist with 4+ years of experience building predictive models, developing data pipelines, and deploying cloud-based machine learning solutions. Skilled at transforming complex datasets into actionable business insights.

SKILLS

- Python
- SQL
- AWS
- Machine Learning
- Git

EXPERIENCE

DATA SCIENTIST

NorthStar Analytics | Jun 2021 – Present

- Developed machine learning models that improved customer retention prediction accuracy by 22%.
- Built automated ETL pipelines using Python and SQL, reducing data processing time by 35%.
- Deployed production models on AWS, ensuring scalable and reliable inference services.
- Collaborated with product and engineering teams to translate business requirements into data-driven solutions.

DATA ANALYST

Insight Solutions | Aug 2019 – May 2021

- Created SQL dashboards and reports used by senior management for strategic decision-making.
- Performed exploratory data analysis on large customer datasets.
- Automated recurring reporting processes using Python scripts.

EDUCATION

B.S. in Computer Science

University of Washington | 2019

PROJECTS

CUSTOMER CHURN PREDICTION

- Built a machine learning pipeline using Python and AWS.
- Achieved 89% prediction accuracy on customer churn datasets.

SALES ANALYTICS DASHBOARD

- Designed SQL-based reporting system reducing manual reporting effort by 60%.
