PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5 years of experience developing scalable web applications and cloud-native services. Strong background in frontend development and modern software engineering practices.

SKILLS

- Java
- React
- Docker
- Git

EXPERIENCE

SOFTWARE ENGINEER

BrightTech Systems | Mar 2020 – Present

- Developed responsive React applications serving over 50,000 monthly users.
- Containerized microservices using Docker, improving deployment consistency.
- Implemented CI/CD workflows that reduced release times by 40%.
- Collaborated with cross-functional teams using Git-based development practices.

JUNIOR SOFTWARE DEVELOPER

Digital Ventures | Jul 2018 – Feb 2020

- Built Java backend APIs supporting customer-facing applications.
- Participated in code reviews and software quality initiatives.
- Assisted in migrating legacy applications to modern web architectures.

EDUCATION

B.S. in Software Engineering

Texas State University | 2018

PROJECTS

TEAM COLLABORATION PLATFORM

- Developed a task management web application using React and Java.

- Implemented authentication, role-based access control, and activity tracking.

DOCKERIZED API SUITE

- Created containerized backend services for simplified deployment and testing.
